Missile Briefings for DCI

1. As you know, Dr. Scoville is going to give the DCI a series of briefings on guided missiles. A substantial part of these briefings will be represented by the production and deployment aspects of the various Soviet missile systems.
2. We believe it would be highly desirable for a senior I/CM analyst to accompany Dr. Scoville to these briefings and give support on the production and deployment aspects.
3. If you agree, will you call the AD/SI on this?
